HBF LOGICwork Casegood Specifications

**All HBF casegood orders must be accompanied by suite layout drawings.
Drawings are needed to confirm proper unit configuration.
If drawings are not included, orders may be delayed to confirm specifications.**

Veneer

The following slip matched, plain sliced veneers are available with the finish options as shown below. Pricing for these veneers are shown by veneer grade.

Anigre: Color and grain variations are typical characteristics of anigre veneer. Color may range from light yellow to pale brown, sometimes with a pink tint. The grain pattern of anigre will also vary in frequency and size; grain pattern changes should be expected within a given product or suite of furniture.

FSC Certification

HBF has been granted Forest Stewardship Council (FSC) Chain-of-Custody Certification (SW-COC-003305) by the SmartWood program of the Rainforest Alliance. This new certification agreement will allow HBF to offer FSC certified wood veneer or core on a project basis to maintain Chain-of-Custody for the design firm and client. FSC Chain-of-Custody certification tracks certified wood from the forest to final production to ensure that responsible forestry practices were maintained at every level and to preserve this natural resource for generations to come. Contact HBF Customer Relations for pricing and lead time information.

30	Toffee		M*					

M* (maple): These finishes are available only on maple seating and occasional table products and allow the specifier to create a finish that is complementary to non-maple veneers available on conference and casegood products. HBF's maple seating and occasional table products can therefore be specified with HBF conference and casegoods constructed with the available non-maple veneers and create an office environment with complementary wood tones. These finishes are not available on conference or casegood products.

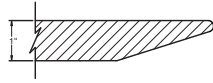

18 Biscotti on maple complements 17 Scone on sapele
 20 Hazelnut on maple complements 19 Butterscotch on anigre
 22 Cider on maple complements 21 Chai on anigre
 24 Chocolat on maple complements 23 Mocha on rift oak
 26 Latte on maple complements 25 Cocoa on walnut
 28 Nectar on maple complements 27 Honeycomb on walnut
 30 Toffee on maple complements 29 Nutmeg on walnut

All conference and casegood products are standard with a 30° sheen.

An upcharge of **10% Net** per unit for conference and casegood products, with a minimum upcharge of **\$500 Net** per order will apply for any custom wood finish.

HBF LOGICwork Casegood Specifications

Profile Edge Details

Worksurfaces

LOGICwork components have a 1" (25mm) thick worksurface premium grade veneer top faces. Edges are bordered with solids or edgebands.

Melamine

Melamine material is used on various LOGICwork components and is standard in two colors. Nubian Brown was selected to closely match the Satin Bronze metal finish, Fog Grey matches the Satin Pewter finish. The appropriate melamine color will be selected by HBF based on specification of finish for metal components.

Pedestals

Two depths for desks and garages/credenzas/returns.

Doors

Three (3) ply veneer doors are mounted with universal adjustment concealed hinges.

Levelers

All floor casegoods have adjustable levelers.

Modesty Panels

Desks modesty panels are available as finished, fixed panels that overlay the pedestal. Credenza, return back panels and bridge modesty panels are available as finished, fixed panels or as recessed, unfinished back removable access panels.

Drawers in Wood Pedestals

Box and file drawers are 1/2" wood, doweled to form a four (4) sided rectangle with separate drawer front. Drawer bottoms are 1/4" thick and fitted in a dado groove so it is captured on four sides. Drawer faces are mechanically attached to allow for easy alignment. Each desk equipped with a box/box/file pedestal will include one maple divider and one maple pencil tray. Center drawers are optional and include a cherry or maple pencil and paper clip tray, see HBF Casegood Accessories. Center drawers are standard on all LOGICwork table desks.

Suspension in Wood Pedestals

All box drawers are standard with telescopic, full extension, ball-bearing slides. All file drawers are standard with fully progressive, full extension, ball-bearing slides.

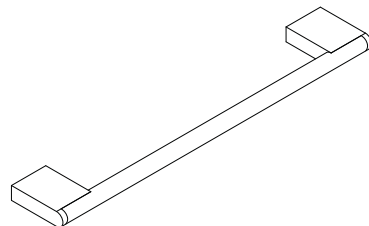

Removable Access Panels

LOGICwork garages, credenzas, returns or bridges without a finished back can be specified with removable access panels in the kneespace. This panel is positioned 4-1/2" from the back of the unit and can be easily removed to allow for complete wall access. When installed, the top of the access panel will be 2 5/8" from the underside of the worksurface to allow for wire or cable egress. The back of this panel and the back of pedestals are unfinished.

LOGICwork credenzas, returns or bridges specified with a finished back will be constructed with a fully finished, fixed modesty panel.

Pull Hardware Options

LOGICwork pulls are available in HBF Satin Nickel finish and are sized to fit appropriately on the door or drawer front.

HBF LOGICwork Casegood Specifications

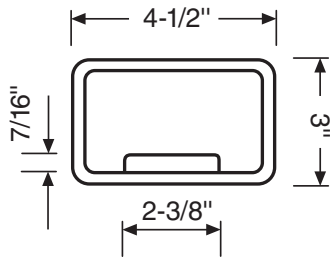

Locks

All wood case pedestals are standard with Satin Nickel face locks. All vertical storage cabinets, overhead cabinets and bookcases with doors are available with optional face locks. These locks will match the pedestal lock. **Add \$95 List** per lock for factory installation. (Locks standard on vertical cabinet file drawers)

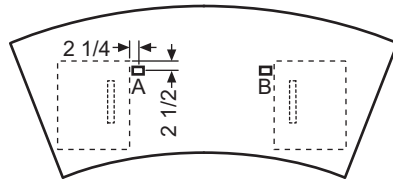

Each individual unit (i.e. desk, credenza, overhead storage unit, etc.) will be keyed alike. If complete offices are required to be keyed alike, this designation must appear on each order. Units will be shipped with the lock barrels and locking mechanisms in place. A separate package will contain the appropriately numbered cylinders for field installations. If no specific lock instructions accompany the order, random keying between complete units will be installed.

Grommets

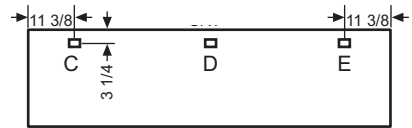

Grommets are optional on all LOGICwork desks, credenzas, returns, bridges, table desks, and desk extensions. **Add \$195 List** for each factory installed grommet. Grommet is available in HBF Satin Pewter and Satin Bronze powder coat finish.

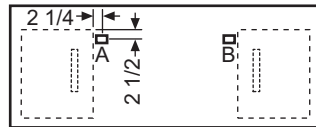

For added convenience, the drawings below should be used to define the placement of each optional grommet location. Please attach a copy to the order.

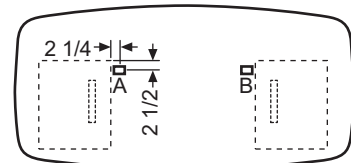

Desk - Arc Top

Credenza, Return, Bridge

Desk - Rectangular Top

Desk - Arched Boat

If standard grommet placement locations do not provide suitable accessibility, a formal drawing of specified grommet location showing exact dimensions must accompany the order. No order specifying non-standard grommet placement will be entered until these drawings are received and approved by HBF.

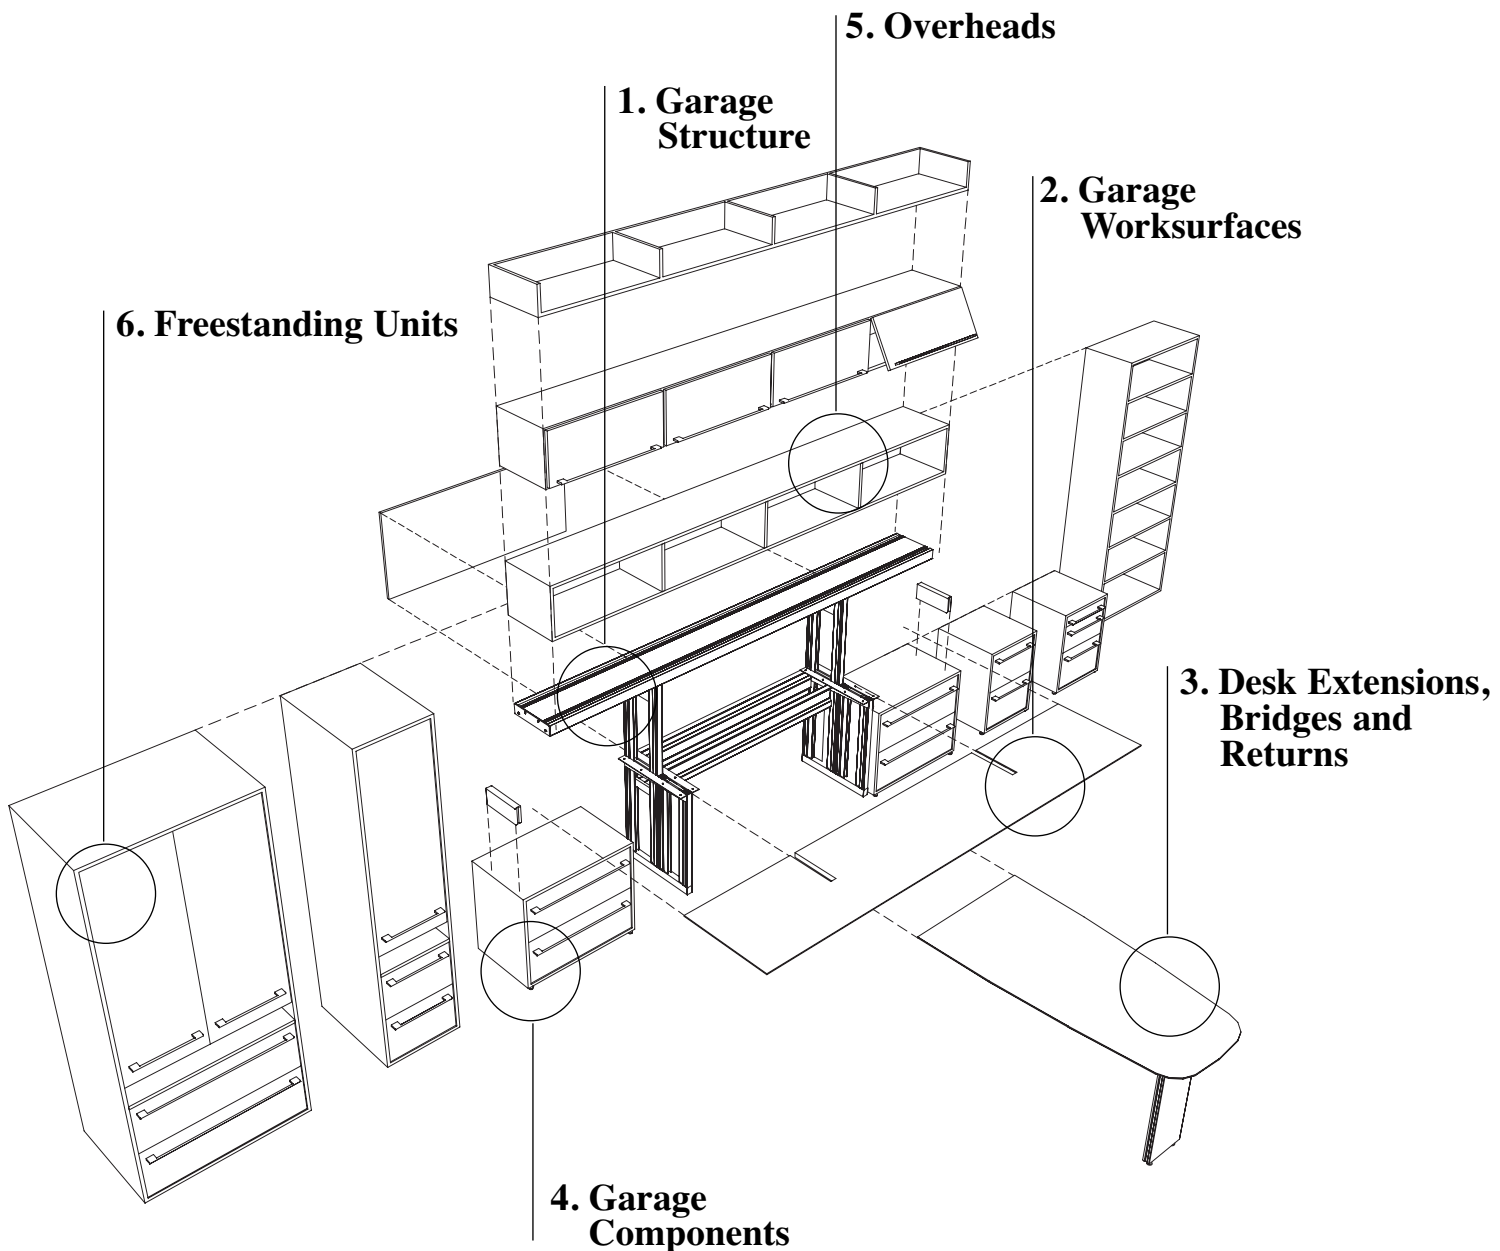

HBF LOGICwork

Specification Process

LOGICwork components should be specified in the following order:

1. Garage Structure
2. Garage Worksurfaces
3. Desk Extensions, bridges and returns
4. Garage Components: Filing and storage, removable access panels, end supports, cladding, garage tackpanels
5. Overheads
6. Freestanding units: vertical storage units, bookcases, desks and credenzas
7. Accessories: paper management shelves and trays, power units and task lighting

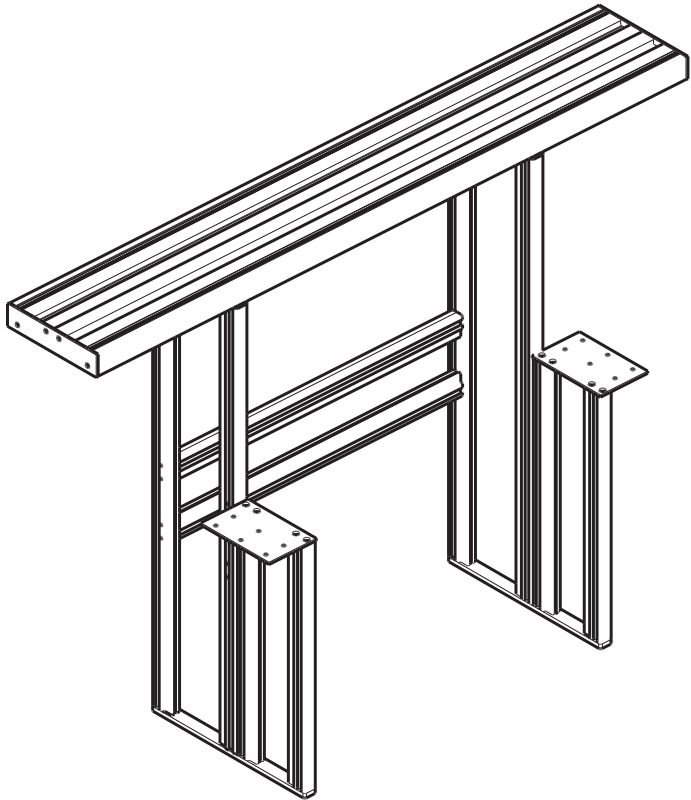

The following price list pages provide ordering information and pricing for all LOGICwork components.

HBF LOGICwork

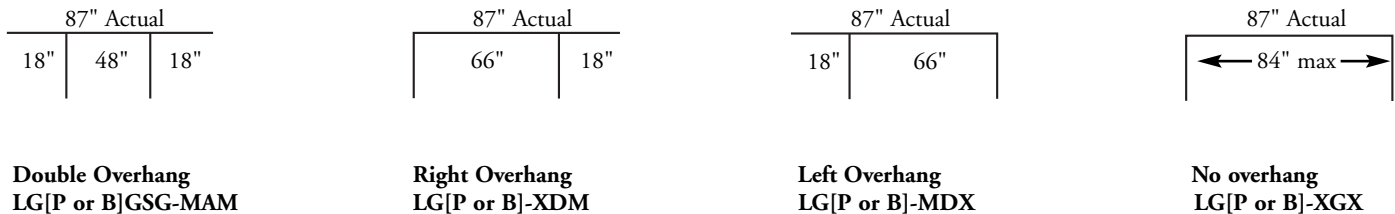

Garage Structure

The LOGICwork garage supports other LOGICwork components to create a variety of workwall configurations.

- Eight actual widths: 75", 81", 87", 93", 99", 105", 111", 117"
- Four overhang width dimensions: 0" (no overhang), 18", 30", 36"
- Maximum allowable distance or span between the two vertical supports is 84", minimum is 36"
- Each vertical support column is 1 1/2" wide, actual width of garage will be 3" wider than nominal width. Nominal width is used for garage specification purposes.
- The back of garages and all of its components are unfinished.
- Task lights may only be installed between the two vertical supports of the Garage Structure; refer to minimum opening under Task Lights to determine the style that can be accommodated between the vertical supports.

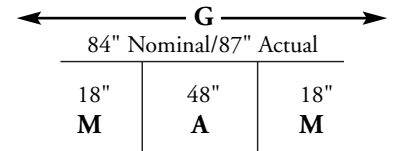

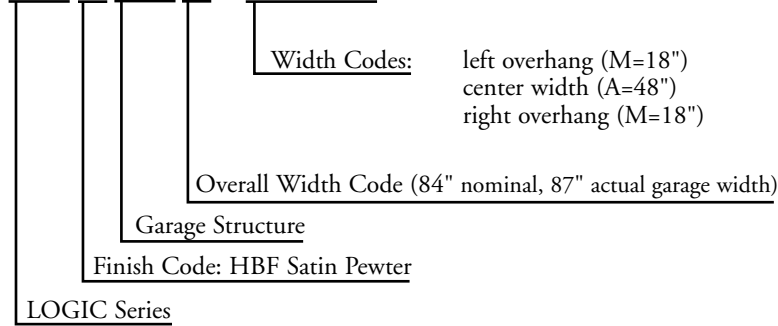

Diagrams below illustrate four overhang options for LOGICwork garages. Garage structures can be created in 87 different configurations by specifying different overall garage widths and different overhang widths. Included with diagrams are the appropriate style numbers for the examples. All configurations have an actual width of 87" and a nominal width of 84".

HBF LOGICwork

Garage Worksurfaces

LOGICwork garage worksurfaces are attached to the garage structure and include two recesses/slots to accommodate the garage vertical supports.

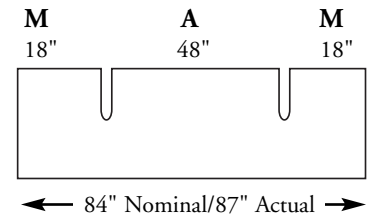

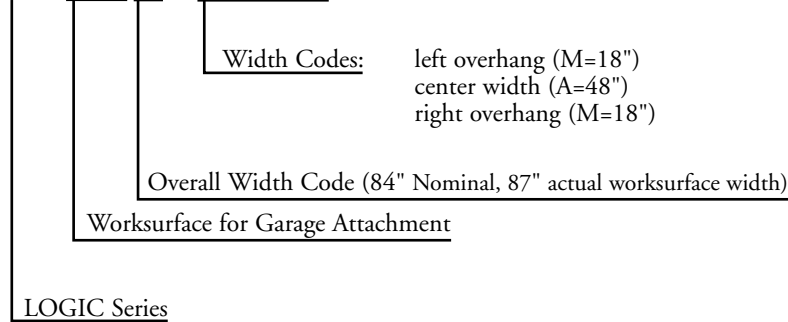

- Garage worksurfaces are available in 12 widths
- Overall depth is 25"
- Actual width of the garage worksurface will be 3" wider than nominal width due to the two 1 1/2" recesses that accommodate the garage vertical supports
- LOGICwork garage worksurfaces will include the appropriate standoffs.

Style Number Descriptions

Product Code: Denotes the product as a return and also specifies the number of return finished sides.

41 - 1 Side: Front finished. Return back is unfinished.

42 - 2 Sides: Front and one end finished. Return back is unfinished.

43 - 3 Sides: Front, back and one end finished.

Finished - 1 Side (41)
Nominal Width = Actual Width
Actual Depth = 25"
Standard Black Unfinished Back

Finished - 2 Sides (42)
Nominal Width + 2 1/2" = Actual Width
Actual Depth = 25"
Standard Black Unfinished Back

Finished - 3 Sides (43)
Nominal Width + 2 1/2" = Actual Width
Actual Depth = 25"

Note: NOT a wall mounted unit. For use above a wall mount.										

Single high and double high wall mounted overhead cabinets to be used with corresponding height wall mounted vertical cabinets. Proper installation of wall mounted overhead cabinets is the sole responsibility of the customer and is crucial to prevent personal injury.

Due to the depth of door hardware, end doors on LOGICwork overhead units are hinged to open inward in order to prevent damage to adjacent vertical storage units or wall.

Garage Mount Monitor Arm

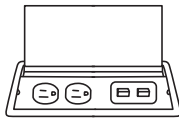

AC[P or B]98F	140			
---------------	-----	--	--	--

[P or B]: indicate P for Satin Pewter, B for Satin Bronze

Note: Monitor arm is supplied with necessary hardware for installation on vertical support of garage. Garage mount monitor arm must be used between two garage vertical supports, and is intended for use only with LOGICwork Garage systems.

Power Center with Grommet

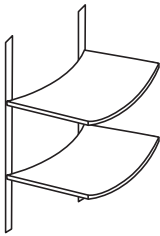

AC[P or B]96M	250	7	10 3/4	
---------------	-----	---	--------	--

[P or B]: indicate P for Satin Pewter, B for Satin Bronze

This power/data unit provides two (2) 110 volt electrical outlets and two data jacks. The unit uses a soft cord with grounded plug.

Curved Accessory Tray Set

AC[P or B]98H	250	10	10 3/4	
---------------	-----	----	--------	--

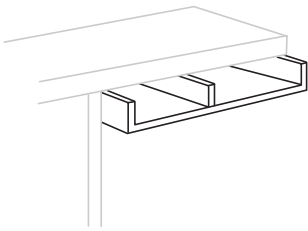

Includes mounting hardware for connection to garage vertical and two shelves, intended for use only with the LOGICwork garage system.

AC[P or B]98J	90	10	10 3/4	
---------------	----	----	--------	--

Additional curved shelf for AC [P or B] 98Hs

[P or B]: indicate P for Satin Pewter, B for Satin Bronze

Accessory Trays

	No. of Compartments		OW	OD	OH	
AC[P or B]96J-18	1	215	18	13 1/2	2 3/4	15
